

SHEKHAR DUBEY

Senior Frontend Engineer | React.js | JavaScript | TypeScript | UI Architecture | Performance Optimization

📍 Gurugram, India ✉ dubeyshekhar1997@gmail.com 📞 +91 73103 00648 🌐 Github 🔗 LinkedIn

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years of experience building scalable, high-performance web applications using React.js, JavaScript (ES6+), TypeScript, Redux, and modern frontend architectures. Strong expertise in component-driven development, micro-frontend architecture, performance optimization, reusable UI systems, and enterprise application development. Proven track record of improving application performance, reducing load times, optimizing Core Web Vitals, and delivering maintainable, production-grade user interfaces. Experienced in REST API integration, testing automation, cross-functional collaboration, and Agile software development.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, Tailwind CSS, Bootstrap

State Management: Redux, Context API

Testing: Jest, React Testing Library, Playwright, Unit Testing, Integration Testing, End-to-End Testing

Performance Optimization: Code Splitting, Lazy Loading, List Virtualization, Rendering Optimization, Core Web Vitals (LCP, CLS, INP)

Architecture: Micro Frontends, Module Federation, Component-Driven Development, Scalable UI Architecture

Build Tools & Version Control: Webpack, Babel, NPM, Git, GitHub

Web Fundamentals: Browser Rendering Pipeline, Critical Rendering Path, Reflow, Repaint, Event Loop, Call Stack, Microtasks, Macrotasks

Networking & Security: REST APIs, Network Fundamentals, Application Security Best Practices

Development Practices: Agile, Scrum, SDLC, Code Reviews, Debugging, Cross-Team Collaboration

PROFESSIONAL EXPERIENCE

WiseTech Global, Senior Software Engineer

04/2024 – Present | Gurugram

- Architect and develop scalable frontend solutions for logistics and enterprise platforms using React.js, JavaScript, and modern UI engineering practices.
- Integrated AI-assisted development workflows using Claude and GitHub Copilot for architecture exploration, edge-case test generation, and performance refactoring, improving feature delivery speed by approximately 30%.
- Improved UI performance by 30% and reduced application load times by 40% through code splitting, lazy loading, and rendering optimization.
- Built real-time dashboards for contract management and shipment tracking, improving user productivity by 25%.
- Implemented micro-frontend architecture using Module Federation, enabling independent team deployments and improved scalability.
- Optimized frontend applications against Core Web Vitals, including LCP, CLS, and INP, to enhance page responsiveness and user experience.
- Implemented list virtualization to efficiently render datasets containing 10,000+ rows without compromising performance.
- Developed automated test suites using Jest, React Testing Library, and Playwright, achieving 80%+ test coverage and improving release confidence.
- Collaborated with cross-functional teams including product managers, designers, and backend engineers to deliver robust user-facing features.

Blume Global, Senior Software Engineer

05/2021 – 03/2024 | Bangalore

- Designed and developed scalable React-based frontend architectures for enterprise shipment visibility and logistics platforms.
- Built reusable and maintainable UI components to improve development speed, consistency, and long-term scalability.
- Integrated frontend applications with backend services and optimized API integration patterns to reduce UI defects and improve data reliability.
- Improved application performance through lazy loading, efficient state management, and code splitting.
- Worked closely with product and engineering teams to deliver high-quality features in Agile/Scrum environments.
- Contributed to debugging, performance tuning, and frontend maintainability across multiple business-critical modules.

Wipro Limited, Project Engineer

06/2019 – 05/2021 | Noida

- Migrated legacy frontend applications to React.js, improving maintainability, scalability, and developer productivity.
- Collaborated with backend teams to integrate REST APIs and improve frontend data flow across applications.

EDUCATION

B.Tech, Madan Mohan Malaviya University of Technology

04/2015 – 04/2019 | Gorakhpur

KEY PROJECTS

Shipment Tracking Dashboard

- Built real-time shipment tracking interfaces using React.js and REST APIs for logistics workflows.
- Improved visibility into shipment events through scalable and responsive UI components.

Contract Rate Management System

- Developed scalable UI workflows for contract lifecycle management, improving usability and operational efficiency.
- Built maintainable frontend modules to support complex business rules and enterprise data handling.
